Reading poems
The poems in this book present small moments in life. Every time you read together, we recommend selecting one poem, and reading it together. Does the poem remind you of something that once happened? This may be a good opportunity for you, parents, to share a childhood experience with your child, creating closeness and intimacy with them.

Looking through the family album

You may enjoy looking at parents' family photo albums together, searching for special childhood moments. You could also look at early childhood photographs of the children, and share information about the moments captured. Which memories do they evoke in you?

הַמְחָשָׁה

Dramatizing together

Do you have a favorite poem among those included in this book? If so, how about acting it out together, with the grownups playing the parts of the children, and vice versa.
