Playing Hide and Seek
Let's play hide and seek! We can hide our fingers in the palm of our hands, cover our nose and reveal it, hole up under a blanket, conceal ourselves behind the couch, or hide a toy behind our backs.

Who wants to go first?

Seek Out the Cat
Meow! The grey kitten has joined our game of hide and seek. You can search for it every illustration, just be careful not to step on its tail...

Some Reading Advice: How to Turn Books into Friends?

Reading from an early age plays a key role in toddler development; however, like anything new, the question is – how do we find the way? We suggest getting acquainted slowly and gradually; let the toddler connect to the book in their own way: Touching, opening and closing, and even “tasting” it with their mouths. Afterwards, you can read: A little each day, patiently and with pleasure. At first you could even read a single page, introducing it and getting accustomed to it, and hey presto – you have turned a book into a friend!
