A childhood song — The Little Bunny [HaShafan HaKatan]
This book was inspired by the well-known children's song The Little Bunny [HaShafan HaKatan] by Binyamin Caspi. You may want to ask your child which children's song this story reminds them of, and then sing and dance together.

Do you have any other favorite children's songs? You could create a family songbook, and select one to sing together from time to time. You too may be inspired to write a story about it.

יְצִירָה

Where are you in this story?

Reading both words and illustrations – You may enjoy taking turns reading this book to one another: you can read the words to your child, and then have them tell you the story using the illustrations.

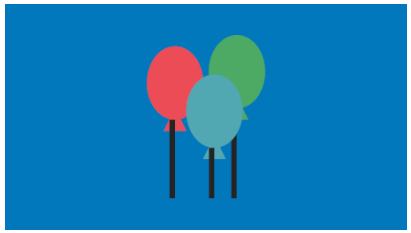

Our table – draw an empty table and choose who to invite over: it can be family and friends, real or imaginary, favorite toys, or characters in books. What would you serve your guests? What do you think would happen when they all meet one another?

חֲגִיגָה

Inviting people round

Having a friend visit us is exciting. You may want to prepare for the visit together and discuss how to welcome this friend, how to pass the time together when they get here, and what to do if each of you prefers to do something else.

Kind words in our family

The bunny's friends thank him, and he uses kind words when speaking to them, like "please", "so glad you came over", and "bon appetit!". When you sit together for a family meal, you could take turns saying kind words to each other: the first begins by giving the one on their right a compliment; the second compliments the third, and so on. The compliment can be about something nice they had done, a good quality they have, having behaved pleasantly, or any other positive thing you can think of. If you look for it, you'll be sure to find it...
